Evaluated Competencies

#1 Professionalism

Educational Objectives: Students will demonstrate professionalism in caring for patients and interaction with other providers and staff.

Method of Evaluation: Faculty will directly observe and interact with students in a one to one setting or in small groups. They will also provide direct feedback to the students.

#2 Patient Care

Educational Objectives: Students will perform History and Physicals on patients as well as interpret lab and imaging results to determine diagnosis, staging, and to help formulate treatment plans for hematologic and oncologic conditions.

Method of Evaluation: Faculty will directly observe and interact with students in a one to one setting or in small groups. They will also provide direct feedback to the students.
