2023-2024 Catalog

Coronary Care Unit - Jacksonville
MED E 9J | 4th Year Elective | Internal Medicine | Clinical Science | Jacksonville
MDT 7200 | Coronary Care Unit Jax

Prerequisites
4th year medical student.

Course Description
This elective involves rounding on the Cardiology Coronary Care unit with the house-staff assigned to the service. This will generally consist of two teams each formed by two or three residents (IM or EM) and a Cardiology Fellow. One attending physician is typically in charge of both teams. Call usually alternates between the two teams. Pre-rounds usually occur prior to meeting with the attending physician who will determine the exact hour to officially round on patients admitted to the CCU. The attending physician usually rounds with the post-call team first in the am so as to allow them to finish early and stay within regulations of duty hours. Cardiology fellows are in charge of the assignments of patients to house-staff and the overall operations of their teams. Medical students will be working directly under the supervision of the house-staff assigned to them.

Course Faculty and Staff
- Liz Cowart (Unknown)
- Gladys Velarde MD (Director)
- Elisa Sottille MD (Co-Director)
- Dani Brown (Course Staff)
- Lavetta Jones (Course Staff)
- Sandra Reisig (Course Staff)
- Shia Mendoza (Course Staff)
- Frank J Genuardi MD, MPH (Other Faculty)

Meeting Place and Time
On the first day of the rotation, please report to the Cardiology Lobby, 5th Floor of the ACC Building, at 8:30 am.

Course Materials
Recommended texts:
Rapid Interpretation of EKGs by Dale Dubin
Braunwald's Heart Disease; 8th ed A Textbook of Cardiovascular Medicine

Additional Educational Materials may be obtained from The Borland Medical Library and other in house permissible educational sites.

Additional Information
Before and during the elective, contact Shia Mendoza at 904-244-4705/shia.mendoza@jax.ufl.edu or Sandra Reisig at 904-244-3066/Sandra.reisig@jax.ufl.edu, for assistance.

At the end of a 4-week rotation, a 4th year medical student should be able to do the following:
2. Interpret basic CXR in a systematic way and able to recognize cardiovascular landmarks
3. Interpret basic rhythms on telemetry monitoring
4. Be able to conduct a thorough physical exam with emphasis on the cardiovascular system and identification of normal vs abnormal cardiac sounds.
5. Be able to identify the clinical presentation of Acute Coronary Syndromes
6. Be able to identify the clinical presentation of Acute decompensated Heart Failure
7. Be able to identify lethal arrhythmias (Vtach, Vfib)
8. Be able to identify certain cardiac emergencies including but not exclusive to ACS, ADHF, Hypertensiv emergencies, pericardial tamponade, cardiogenic shock.
9. Be able to identify key therapeutic protocols for each of these emergencies.

Conferences:
Medical students rotating in either of the cardiology electives are required to attend all core conferences offered to cardiology fellows in the Department of Cardiology. You can get weekly schedule of conferenc from Cardiology Program Administrators, Sandra Reisig and Stacey Wice. Students are also required to attend Monday Morning Report, which occurs on Mondays at 7:45 am, unless otherwise noted on the conference schedule. Additionally, medical students are encouraged to attend other didactic sessions in interventional cardiology or echocardiography as their schedule permits.

Evaluations:
Medical students in the cardiology rotations will be evaluated by the house staff they worked under and attending physician who was in charge of the team at the time.

Grading: Pass or Fail

**Evaluated Competencies**

**#1 Professionalism**

**Educational Objectives:** Demonstrates respect for patients; families; and members of the health team. Demonstrates an attitude of caring. Preserves patient confidentiality; and demonstrates knowledge about HIPAA regulations. Demonstrates timeliness.

**Method of Evaluation:** Faculty observation and feedback from residents.

**#2 Patient Care**

**Educational Objectives:** Conducts efficient; comprehensive; medical interviews and physical examinations; and records accurate information. Integrates information from medical history and physical examination into coherent problem list/differential diagnosis; and uses this information to determine cost-effective test ordering. Appropriately interprets diagnostic test results. Formulates appropriate management plans and writes orders. Presents clear and concise patient information during rounds. Writes progress notes using SOAP format. Seeks opportunities to perform appropriate medical procedures.

**Method of Evaluation:** Faculty observation during attending rounds/procedures and feedback from residents. Mini-CEX.

**#3 Medical Knowledge**

**Educational Objectives:** To develop an organized approach to the differential diagnosis of chest pain and dyspnea. To learn to identify acute coronary syndromes and implement acute and long-term care using evidence-based approach. To learn the presentation and management of acute congestive heart failure and pulmonary edema. To develop a systematic tool for tachycardias in the CCU setting. To be able to make appropriate application of noninvasive and invasive cardiac testing in the critical care setting.

**Method of Evaluation:** Faculty observation during attending rounds and feedback from residents.

**#4 Practice-Based Learning**

**Educational Objectives:** Regularly identifies gaps in knowledge and seek answers to those questions from current medical literature. Demonstrates skills in principles of evidence-based medicine and at the same time appropriately appraises available evidence. Shares results of knowledge discovered with their team. Seeks opportunities to perform appropriate medical procedures.

**Method of Evaluation:** Faculty observation during attending rounds and feedback from residents.

**#5 Interpersonal and Communication Skills**

**Educational Objectives:** Interacts with patients; family members; and colleagues in a manner that engenders confidence; trust; and cooperation. Uses open-ended questions and demonstrates active listening in patient interactions. Works well as a team member.

**Method of Evaluation:** Faculty observation during attending rounds; and feedback from patients; family members; and residents.

**#6 Systems-Based Practice**

**Educational Objectives:** Demonstrates an awareness of resources (e.g. social support; education; financial; access to care; etc.) needed by patients to effectively maintain health and manage diseases.

**Method of Evaluation:** Faculty observation during attending rounds; and feedback from residents.
