Dear Colleagues and Friends:

I am pleased to share with you the Annual Report of the Department of Medicine at the University of Florida-College of Medicine - Jacksonville for the academic year July 2021 through June 2022. Despite the continuing challenges of the Covid-19 pandemic, the faculty and staff of the Department were able to achieve excellence in patient care, education and research.

**Patient care:** The clinical productivity continued growth in essentially every Division and service lines. The number of encounters increased for both the hospitalized patients as well in our outpatient clinics at the 8th street campus, UF Health North and Emerson street campus. The growth in our clinical activities allowed the Department to finish the year with a positive variance to the budget of $1,173,016 and a positive bottom line of $1,163,737

**Education:** The Department continues to excel in its mission of educating students and residents. There were 31 faculty members in the Department who received the Exemplary Teacher Award. In addition, several faculty members and trainees in the Department of Medicine were finalists for key education awards. Dr. Sottile was selected as the Kenneth Kellner Clerkship Director of the Year for the College of Medicine and Dr. Cameron Kahn (PGY-2) was inducted into University of Florida Alpha Omega Alpha (AOA) Honor Medical Society. Continuing Medical Education events, such as the annual Nephrology symposium was offered virtually.

**Research:** The Department had a productive year in research. There were 181 peer-reviewed publications and 13 monographs and book chapters. Faculty made over 130 national and regional presentations. During the academic year 2022, we had 83 research awards. The scholarly productivity of the house staff remained high with 18 published manuscripts and 56 oral/poster presentations at regional/national meetings.

The Department of Medicine continues to excel in every aspect of the academic mission. It is indeed a privilege and a distinct honor to serve as the Chair of the Department.

Sincerely,

Arshag D. Mooradian, M.D.

Highlights

The program continued to pursue excellence in the areas of scholarship, board pass rate, quality improvement, and fellowship match. Training programs remain strong in graduating physicians who support and serve our community. Fellowship or hospitalist practice remains a goal for the majority of our resident trainees.

At the annual program evaluation in the spring, we reviewed components of its self-study, including a SWOT (strengths, weaknesses, opportunities, and threats) analysis and a review of aims for what kind of graduates we want to send out to the medical community at large. In particular, the program aims listed below were reaffirmed and deemed reflective of our academic mission.

- Produce competent, independent practicing internists, who can comprehensively care for patients in both inpatient and outpatient settings
- Prepare competitive resident applicants for fellowship, who have the opportunity to pursue other interests beyond internal medicine. This may include scholarship, education, advocacy, or leadership
- Train practitioners to have a basic understanding of quality improvement and patient safety
- Produce residents who will serve the local community through their practice of primary care, hospital medicine, and medical subspecialties. These practitioners should have expertise in treating the variety of patient populations in our community, with a particular understanding of the medically underserved.
- Develop well-adjusted residents through a programmatic focus on physician well-being. The intent is that emotionally healthy physicians will be more resilient and able to deliver the best care to our community.

The Class of 2022 was diverse in their destinations following graduation. Seven of our graduates sought fellowship training in the subspecialties of cardiology, endocrinology, gastroenterology, pulmonary/critical care, and hematology/oncology. While three graduates were matched to fellowships at other institutions in Florida, New York, Colorado, and Hawaii. Four residents stayed in UF Jacksonville for fellowship and others have pursued hospital medicine and clinical practice in the Southeast region of the country.

We await the American Board of Internal Medicine examination results for the Class of 2022. The Class of 2021 was successful in achieving a 93% pass rate. Presently the program’s ABIM three-year rolling average is 98%, above the national average of 93%. The program continues to provide trainees with a plethora of board preparation materials that include MKSAP and UWorld question banks along with Rosh Board Review each Friday in addition to high-quality clinical training.

The leadership within the residency program remained stable for the past academic year. Drs. Izzo and Fasen continued the tradition of strong chief resident teaching and leadership. They continued to build on the strong foundation from their predecessors with the continuation of the Research Club. The Research Club is a forum for trainees to present new ideas and proposed projects in front of seasoned faculty, research professionals, and fellow trainees to solicit advice and feedback before embarking on a new research endeavor. In addition, they helped develop an ultrasound curriculum (bedside echocardiography, pulmonary, renal, and bladder examinations) that included lectures at Morning Report, clinical bedside training using Butterfly ultrasounds, and hands-on training in the Center for Simulation Education and Safety Research (CSEsAr).
The residents presented to local conferences of the Duval County Medical Society Annual Meeting and the UF College of Medicine Research Day in Jacksonville. Presentations were made at regional conferences that included the Florida Chapter of the American College of Physicians Meetings and the American Federation of Medical Research Southern Region. Residents presented at prestigious national conferences that include the American College of Cardiology, American Thoracic Society, CHEST, Southern Medical Association, Society of General Internal Medicine, and American College of Gastroenterology meetings. Residents continue to produce scholarly activities that included presentations, publications, and abstracts despite the pandemic.

The ultrasound online learning platform and curriculum continued to develop under the leadership of our chief residents, Drs. Izzo and Fasen, as well as our faculty Drs. Harrison and Aung. The utilization of Point of Care Ultrasound (POCUS) increased with the Butterfly handheld ultrasounds in the inpatient and outpatient settings. To facilitate the supply demands for all procedures including POCUS, Dr. Fasen worked with the teams of our Epic electronic medical record, nursing leadership, and central supply department in locating a physical space near the inpatient floors to develop an automated weight bin supply process. Many health care organizations find the need to get a more precise measure of inventory by using weighted bin technology. This inventory management system uses supply bins connected to scales that are hard-wired into a system that records usage based on weight changes. When an item is removed from the bin, the scale shows the count for that item decreasing, indicating the need for restocking. This technology is a real-time saver for the residents as the supplies they need are automatically replenished and ready for the next procedure. This system contributes to billing efficiency while identifying the appropriate amount of supplies to keep on hand to ensure flowing operations.

The medical student experience in the department has continued to thrive with Dr. Elisa Sottile as the clerkship director. In June 2022, Dr. Sottile was appointed the Assistant Dean for Medical Education, working to enrich the UME programs across all Departments. Dr. Sottile meets with students individually to provide feedback, to facilitate self-reflection, and growth plans. As a member of the UF College of Medicine Regional Medical Campus Task Force, Dr. Sottile fashioned innovative changes to the student curriculum to provide an opportunity for learners to better understand health systems science as well as how the social determinants of health impact their provision of care to an underserved population. The campus continues to attract visiting medical students from other institutions. The student program notably continued to grow in terms of the number of students coming from many medical schools to do elective rotations. These students rotate in internal medicine and all of our subspecialties. Student evaluations call attention to the high value of their clinical experiences and the supportive culture maintained by their resident and faculty teachers.

Dean of our campus and CEO of UF Health Jacksonville, Dr. Leon L. Haley, died tragically in a watercraft accident on July 24, 2021. Several leadership changes occurred as a result of the loss of Dr. Haley. Dr. Linda Edwards, the previous DIO (designated institutional official), Senior Associate Dean for Educational Affairs, and Division Chief of General Internal Medicine accepted the position of Dean. Dr. Elisa Zenni, the previous Associate Dean for Educational Affairs, agreed to serve as the DIO and Interim Senior Associate Dean for Educational Affairs. Dr. Zenni became the permanent Senior Associate Dean on July 1, 2022.

For the first time, the program experienced the premature death of a beloved resident, Dr. David Gidla, in May 2022. We have since discovered that it was not a work-related issue but a personal choice to end his life. It was very hard on the residency but we had grief counselors from our institutional Center for Healthy Minds and Practice (CHAmpS) come to our memorial service and made themselves available anytime to be a source of comfort. We received a great resource from our institutional GME office and found the after-suicide toolkit from the American Foundation for Suicide Prevention indispensable in supporting our program and department. Our awareness of suicide and prevention measures was brought to light and we continue to be a support to our residents after such a great loss of an esteemed colleague and friend.

50. Rathore A. A rare cause of myopericarditis with cardiac tamponade due to Arcobacter spp. in the setting of COVID-19. Poster presentation at: Florida Chapter American College of Physicians; October 2021.

60. Rathore A. 76 consecutive cases of robotic-assisted navigational bronchoscopy at a single center. Poster presentation at: Duval County Medical Society Annual Meeting; Jacksonville, FL. October 2021.

HONORS AND AWARDS

Abhinav Karan, MD  Intern of the Year
Jorge Verdecia, MD  Fellow of the Year
Win Aung, MD  Teacher of the Year
Nikita Patel, DO  Best Conference Attendance & Procedure Completion Award
Samuel Foldy, DO  ACP Resident of the Year
Aleem Ali, MD  Senior Resident of the Year, Malcolm T. Foster, Jr., MD Scholarship, & Ann Harwood-Nuss Resident Advocate Awards
Carly Rabinowitz, MD  Rosalie O. Saffos Outstanding Resident Teacher Award

Elisa Sottile, MD was the winner of the Kenneth Kellner, M.D., Ph.D. Outstanding Clerkship Director Award.

Spencer Streit, DO was a nominee for the resident UF College of Medicine Excellence in Student Education Awards.

Carly Rabinowitz, MD was one of the recipients of the resident UF College of Medicine Exemplary Teachers Award.

Dominick Angiolillo, MD; Win Aung, MD; John Catanzaro, MD; Dave Cury, MD; Linda Edwards, MD; Khadija Esmail, MD; Gunjan Gandhi, MD; Peter Ghali, MD; Bharatishn Gharai, MD; Maria Gutierrez, MD; Jeff House, DO; Carmen Isache, MD; Rafik Jacobs, MD; Vishal Jakaransingh, MD; Mariam Louis, MD; Ravindra Maharaj, MD; Ronald Mars, MD; Ghania Masi, MD; Carlos Palacio, MD; Walter Quan Jr., MD; Malleswari Ravi, MD; Pramod Reddy, MD; Bruno Ribeiro, MD; Michael Sands, MD; Srinivasan Sattiraju, MD; James Scolapi, MD; Ron Schey, MD; Vandana Seeram, MD; Elisa Sottile, MD; Siva Suryadevara, MD, Myint Thway, MD; and Martin Zenni, MD are recipients of the faculty UF College of Medicine Exemplary Teachers Award.

The faculty in the Department of Medicine continue to obtain research awards and train future investigators; an important aspect of the University of Florida College of Medicine-Jacksonville’s mission. Trends in external funding for fiscal year 2021-2022 and four prior years are shown in Figure 1.

External funding from federal, state, industry, foundation and other sources decreased 3% this fiscal year compared to last. There was an increase in the number of funded investigators, from 27 investigators last fiscal year to 28 investigators this fiscal year (Figure 2). Unfortunately, there was a decrease in the number of funded projects; from 94 last year to 83 this fiscal year (Figure 3).

Several faculty members in the Department of Medicine have basic/translational science projects in the Medical Research Building. **Mehdi Mirsaeidi, M.D., M.P.H.** (Pulmonary, Critical Care and Sleep Medicine) is participating in prospective clinical trials in critical care medicine and in the area of reducing medical error and optimizing end-of-life decisions. A major aspect of his basic science research is the development of specific lytic bacteriophages for the treating lung infections. **Michael Haas, Ph.D.** (Endocrinology) is investigating molecular mechanisms that regulate expression of genes involved in cholesterol transport and the integrated stress response in human coronary artery endothelial cells. **Kent Wehmeier, M.D.** (Endocrinology), now retired, investigated the effects of nicotine on cellular stress in
smokers and in human coronary endothelial cells and studied the effects of magnetic fields on osteoblast differentiation. Charles Heilig, M.D., (Nephrology and Hypertension) is examining the effect of mechano-growth factor on glucose transporter 1 expression in kidney mesangial cells as well as examining the role of glucose transporters in liver cancer.

Residents and sub-specialty fellows in the Department of Medicine are assigned a mentor and participate in basic, translational, quality improvement research, epidemiological, or clinical research. At the Celebration of Resident and Fellow Education and Research Awards, Dr. Jose Rivas Rios was a poster winner and Dr. Aleeem Azal Ali received the Ann Harwood-Nuss Resident Advocate Award. Dr. Carly Anne Rabinowitz received the Rosalie O. Saffos Outstanding Resident Teacher Award.

Cardiology
Division Chief: Dominick Angiolillo, MD, PhD

DIVISION OF CARDIOLOGY
ACADEMIC YEAR 2021 (7/21 - 6/22)

Highlights
- Expansion of clinical faculty (n=5), including new Section head of EP, 1 EP, 1 non-invasive, 1 interventional cardiologist, and Chief of CT surgery.
- Recruitment efforts for 2 additional non-invasive cardiologist and second CT surgeon
- Collaborative efforts between Cardiovascular Imaging Program and Anesthesia allowing to further expand transesophageal (TEE) program resulting in an overall increase in TEE volume; such expansion has been of benefit for cardiovascular fellowship program
- Expanded outpatient 2D-echo facility (i.e., addition of room downtown and UF North) leading to increase in volume
- Expanded outpatient Vascular Imaging lab providing carotid ultrasound and vascular imaging/mapping (arterial and venous) of lower extremities with plan to expand activities at UF North
- Expansion of Cardiac Rehab program with new facility planned for opening in June 2021; rehab program have expanded to include heart failure and peripheral vascular disease patients, in addition to coronary artery disease patients.
- Further expansion of APP program at Downtown, UF North and St. Mary’s outpatient practices
- Started discussions for expansion of non-invasive imaging program at Kernan in collaboration with Radiology
- Started discussions for expansion of outpatient clinic visits at Fernandina primary care office
- Started pilot scribe program to evaluate increase in outpatient clinic metrics (volume and level of service)
- Started new Cardiology Ground Round series
- Developed an Education Committee
- Developed a Fellowship Review Committee
- Developed a Clinical Assistant Program

Education: The fellowship programs remain competitive. We had a very successful match filling all 6 positions with top tier candidates in our general fellowship program and clinical cardiac electrophysiology.

Scholarly Activity: Our fellows had an exceptional year for scholarly activities acceptance into major regional and international venues. Several projects have been accepted to venues such as; The Society of Interventional Cardiology, The Heart Failure Society, The American Heart Association and The European Society of Cardiology among others. This past March, fourteen presentation from our general cardiovascular fellowship were accepted for presentation at the American College of Cardiology National meeting alone. These projects have been presented virtually given COVID 19 restrictions, while more recently, some were presented in person.

Our fellows actively participate in research projects and quality improvement initiatives, which have been showcased on national platforms as well.

Subspecialty training and work placement: Our graduates who seek further sub specialization continue to successfully match and pursue advanced training into highly competitive subspecialty programs nationwide.

Our post doc/OPS research fellowship has expanded and are integrated with the clinical and translations aspects of the Cardiovascular Research program and partake in other educational activities within the Division of Cardiology.

Our graduates who seek to enter the clinical work force continue to secure employment in very competitive practices.
Board Examination Performance

While this past year our cumulative 3-year board pass rate dropped to 88% (90% mean) due to external circumstances affecting two of our trainees, our fellows performed above average in the In-training Board Examination.

We continue to provide a robust platform for learning and academic discussion. Most of our didactic and academic exchanges changed to virtual or hybrid (virtual and in person) platforms in view of the COVID19 pandemic.

- Monday Morning Report – A case discussion format and mandatory meeting for all fellows to discuss important, challenging cases that present to CCU and/or consult service over the weekend or preceding week.
- Updated core curriculum lectures (weekly) on every cardiology discipline. Content and format is reviewed twice yearly by Education Committee.
- Goals and objectives for every clinical and nonclinical rotation by program year level reviewed yearly by Education Committee.
- Active Cardiology Journal Club q 6 – 8 weeks.
- Ongoing participation on Wellness/Well-Being initiatives for all faculty and fellows.
- Guest lecture faculty participating in our weekly didactic conference sessions.
- Hemodynamic simulation programs.
- Transthoracic and Trans esophageal Echo simulation program via CESAR sim lab for first year fellows.
- General Cardiology fellows develop quality assessment and improvement protocols and present them at research conferences and research day.
- General Cardiology and Clinical Cardiac Electrophysiology fellows participate in a variety of research opportunities in the division and present their work at research conferences and research day.
- General fellows continue to actively participate in EKG, Echo, EP, Valvular and Cath conferences.

The following initiatives have taken place this past year and are resulting in positive results:

- General fellows participation in community engagement – COVID 19 pandemic vaccination efforts to decrease vaccination hesitancy within our institution and in partnership with Florida Blue in disadvantaged ethnic minority communities.
- Update of educational materials for fellowship program, including general cardiology, echocardiography, and nuclear cardiology board review material.
- Updated curriculum to include lectures on bias, discrimination, diversity and inclusion in partnership with the community engagement and diversity office and IDEA.
- Modernization of schedule flow in high clinical demand areas (i.e., non-invasive laboratories).
- Simulation for leadless pacemakers and subcutaneous implantable cardiac defibrillators.
- Left ventricular support and hemodynamic simulation programs, in addition other simulation programs for TEE.
- General Cardiology fellows continue to develop quality assessment and improvement protocols and present them at research conferences.
- General Cardiology fellows participate in a variety of research opportunities in the division.
- Cardiology Grand Round series with invited internal, national and international experts.
- Opportunities to obtain CME credit through Cardiology Grand Rounds and Cath Conferences.
- Advanced imaging rotation (Cardiac CT and MR) at UF Health – Jacksonville – Dept. of Radiology.
- Promoted Quality improvement course (yellow Belt Certification).
- Updated core curriculum lectures on every cardiology discipline reviewed twice yearly by Didactic Curriculum Committee.
- Expanded Guest lectures in specific therapeutic areas
  - Pulmonary series with Dr. Seeram (UF – Jax).

**Research:** Our faculty continues to excel in research, scholarly production and participation in national and international scientific sessions. We have approximately 50 ongoing studies, which range from basic/translational research to large scale clinical trials in various areas of cardiovascular disease. These include investigator initiated as well as sponsored studies. We have published approximately 80 peer-reviewed manuscripts, several book chapter, numerous abstracts and presentations at local, national and international meetings. We currently hold leadership positions in most major cardiovascular societies and editorial positions in many major cardiovascular journals. We continue to receive consistently increasing extramural funding, from private and federal sources. Our research staff has also expanded with the addition of research OPS who assist with our research activities at our cardiovascular research building which hosts a state-of the art thrombosis research laboratory, patient waiting area, clinical visit rooms, and offices for research staff.

**DIVISION OF ENDOCRINOLOGY, DIABETES AND METABOLISM**

**ACADEMIC YEAR 2022 (7/21 - 6/22)**

**Highlights**

The Division of Endocrinology, Diabetes and Metabolism had a year of sustained change and development in all areas of the academic mission of the University of Florida. Clinically, major events included expansion of clinical services geographically and provision to a broader audience including the growth of virtual visits as a way to provide care to patients during the COVID-19 crisis. Academically, the Division submitted multiple manuscripts, delivered multiple scholarly presentations and contributed to the university’s educational mission.

**Patient care:** The Division provided inpatient and outpatient consultation on site and virtually at the University of Florida College of Medicine-Jacksonville campuses, Emerson Medical Plaza, and UF North campus to faculty of the university and referring physicians in the northeast Florida/southern Georgia region and beyond. The core clinical faculty of the Division include Dr. Joe Chehade, Dr. Marliu Jurado, Dr. Gunjan Gandhi, Dr. Arshag Mooradian and Dr. Kent Wehmeier. During this academic year Melody Beers, ARNP, was added to care for these patients. The Division addressed clinical endocrinology issues related to hypothyroidism, pituitary, thyroid, pancreas, adrenal and sex hormone gland dysfunction as well as gender identity. Patients with metabolic disorders including diabetes mellitus, polycystic ovary syndrome, obesity, anorexia, hypercholesterolemia, calcium and metabolic bone diseases such as osteoporosis and vitamin D deficiency were evaluated and treated. The Division’s clinical operations occurred at UF Endocrinology and Diabetes at Emerson Medical Plaza, UF Health - Jacksonville Ambulatory Care Center (ACC) and at the UF Health North Hospital and Clinic. Our providers performed analyses of the glucose monitoring data, obtained by continuous glucose monitoring to make recommendations regarding diabetes management. Institution of point-of-care HbA1c testing expedited decisions in diabetes management at all sites. Diabetes care has matured with the partnering of outpatient diabetes medical nutrition therapy with the Division of Endocrinology. Kristina Worthington, MSH, RD/N, CSSD, LD/N provides onsite education at the UF-Emerson and UF North clinics for diabetes management, carbohydrate counting and medical nutrition therapy (MNT). Ms. Worthington also brings to the Division expertise in high performance dietetics and other areas of nutrition counseling including measurement of basal metabolic rate and onsite facilitated nutrition prescriptions for patients. Dr. Chehade and Dr. Jurado utilized ultrasound for diagnosis and ultrasound guidance for the evaluation of patients with thyroid nodules, parathyroid neoplasia, lymph nodes, and thyroid cancer.

A unique collaboration with the UF College of Medicine-Jacksonville’s Department of Oral Maxillofacial Surgery, Surgery, Radiology, Nuclear Medicine and Pathology has enhanced the care of patients with thyroid and parathyroid disease. Through the discussion and implementation of diagnostic and treatment protocols, the care of these patients has been standardized to better evaluate outcomes and focus on patients with more challenging management issues.

The care of patients with pituitary or sellar tumors was also advanced through the collaboration of the departments of neurosurgery, radiology, radiation therapy, pathology and otorhinolaryngology. During weekly conferences, challenging cases were presented to the group to provide unique diagnostic and treatment approaches for individuals with rare neoplasms and unique presentations.

On the inpatient service, more patients were served by endocrinology consultation. The Division also provided evaluation and management in the areas of diabetes, thyroid disease, electrolyte disorders, adrenal insufficiency and patients with pituitary issues at UF Health Jacksonville and UF Health North to facilitate optimal care of patients with these conditions. Leading the charge for better inpatient diabetes care, the Division’s own Dr. Gandhi chaired the Diabetes Steering Committee. This multidisciplinary body of physicians, nurses, pharmacists, dieticians and performance improvement specialists comes together to
discuss common issues in glucose control at UF Health Jacksonville. Strategies to improve outcomes are discussed and implemented.

**Education:** The Endocrinology fellowship continues to maintain its ACGME accreditation, under the direction of Program Director, Dr. Gunjan Gandhi and Dr. Kent Wehmeier as Associate Program Director. Drs. Jennifer Batch and Lauren Graham joined the Division in July 2021. Dr. Allyn Rivero and Dr. Firas Warda have been exceptional and productive additions to the Division and completed their fellowships June 30, 2022. All four fellows have made substantive contributions to the clinical care, education, and research mission of the Division. In resident physician education, Dr. Wehmeier continued as rotation coordinator of relevant educational programs for Endocrinology. He is the primary liaison between the Core Residency Program and the Division, and is a member of the Resident Education Committee. The faculty members and fellows participate in teaching rounds in the clinic and in conferences to enhance the experience of the rotating residents. Dr. Gandhi has been a Steering Panel member for the Endocrine Society in preparing In-Training Exams for endocrine fellows.

In the educational program of the University of Florida, Dr. Chehade, Dr. Gandhi, Dr. Haas, Dr. Mooradian, Dr. Jurado, and Dr. Wehmeier precept trainees at UF clinics in Endocrinology and coordinate lectures for the University of Florida medical students and residents in medicine. The Division of Endocrinology Grand Rounds provides an avenue for speakers at UF Jacksonville and Gainesville to share knowledge and enhance collaboration between various disciplines at UF. Multiple faculty members were chosen to receive the 2022 University of Florida-College of Medicine’s Exemplary Teachers Award.

**Research:** Strides have been made in making clinical research more attractive to industry and to potential subjects. Under the guidance of Division members, the awards and numbers of subjects have continued to grow. Additional research staff has been added to grow the Division’s efforts. The research has involved the use of devices to control diabetic neuropathy, disorders of hypogonadism, surveillance of thyroid cancer and metabolic bone disease. Dr. Joe Chehade is also spearheading a clinical trial in the new Jacksonville Aging Studies Center (JAX-ASCENT). This site will serve as a hub for aging research in the Northeast Florida/Southeast Georgia area. The basic science research lab, under the direction of Dr. Michael Haas, continues to be a place of learning and scholarly activity. Investigations regarding the effects of multiple hormones on the expression of the most important protein in the high-density lipoprotein (HDL) particle, apolipoprotein A1, and the involvement of endoplasmic reticulum (ER) stress and oxidative stress in coronary artery disease continue to reveal critical insights.

**Service:** Leading the charge for better inpatient diabetes care, the Division’s Dr. Gandhi chairs the Diabetes Steering Committee. This multidisciplinary body comes together to discuss common issues in glucose control. Strategies to improve outcomes are discussed and implemented. Dr. Chehade served in the patient satisfaction committee on the ambulatory side. Dr. Gandhi serves on the institution’s Pharmacy and Therapeutics Committee.

**Philanthropy:** The Division members have been the recipients of many gifts. In the spirit of giving back, the members have contributed their time, effort and resources to the underserved and to children in Jacksonville, as well as overseas.

Highlights

Gastroenterology Division has built an inter-disciplinary team of faculty, advanced practitioners and nurses. Our faculty members were Dr. James Scapolio, Dr. Ron Schey, Dr. Bruno Ribeiro, Dr. Neha Agrawal, Dr. Robert Bass, Dr. Paul Sievert, Dr. Peter Ghali, Dr. Lauren Stemboroski, Dr. Alex Al Khoury and Dr. Yusuke Hashimoto. The allied health professionals included, Rhonda Broughton, Mei Lyn Lamar, Angela Massey, as well as our nurse William Ecker. Our Division continued to respond well to ever changing and challenging clinical environments. Working closely with our surgical colleagues, we continue to have one of the premier upper GI tract disease centers in the state. Our endoscopic ultrasound activity continues to lead the way with diagnostic tools such as EndoFLIP and Digitrapper, which have made us a referral destination for a wide catchment area. Our hepatology program now has regular transplant clinics in close conjunction with the team in Gainesville. Several patients have now been successfully transplanted and their care integrated between the two sites. Our Fellowship program remains strong and is academically productive. We would like to thank every team member for going the extra mile to take care of our patients and each other.

Patient care: The patient care aspect of our academic mission is pursued at the following locations: UF Health North with general GI clinics and endoscopy, Emerson campus, where we provide general gastroenterology, inflammatory bowel disease, and hepatology services, Towers clinic with general gastroenterology and hepatology clinics, UF Beaches with general gastroenterology and hepatology services. Endoscopy is performed at three clinical sites: UF Health Downtown, UF Health North, and Jacksonville Beach Surgery Center. Inpatient consult services are provided at UF Health Downtown as well as UF Health North. Our mission is to have timely patient access to top quality patient care with specific attention to reduced patient wait times and increased access to high-quality gastroenterology and hepatology services in any of our locations.

Education: Dr. Ghali, as the Program Director of our fellowship-training program, has maintained a high quality of trainee’s satisfaction based on the 2021-2022 ACGME survey. Dr. Lauren Stemboroski has now accepted the role of Associate Program Director and her impact has been immediate and overwhelmingly positive. The overall evaluation of the program was rated at 80%, and the gastroenterology faculty that participated in the ACGME survey gave the program an overall, 86%, both just above the national mean. Our fellows’ board pass rate has consistently been 100% for fellows that have taken the exam. Our priority remains recruiting gastroenterology fellows with a proven track record of clinical research as well as commitment to superb patient care, interpersonal skills and professionalism. Our fellowship complement has increased to three per year. We continue to be very active at the Jacksonville Gut Club quarterly meetings. This educational venue is very important to our division’s presence in the community. We have reacted to the COVID-19 pandemic. We discussed the challenges with each other, with our fellows, and with our staff, and we are all involved in improving the processes to promote physician well-being.

Research: All faculty members have been productive in scholarly activities over the past academic year. The Division produced four peer-reviewed published manuscripts, six abstracts and one oral presentation. The GI faculty have given multiple presentations at local, regional, national, and international meetings. The Division now has eight funded research protocols and was able to generate over $900,000 in grants last year.
LISTING OF FACULTY MEMBERS

Neha Agrawal, M.D., Assistant Professor
Medical School: Motilal Nehru Medical College, Allahabad University, Allahabad, India
Internship/residency: University of Illinois College of Medicine, Urbana, IL
Subspecialty training: Temple University Hospital, Philadelphia, PA

Alex Al Khoury, M.D., Assistant Professor
Medical School: Motilal Nehru Medical College, Allahabad University, Allahabad, India

Annual Report AY 2022 Gastroenterology

Annual Report AY 2022 Gastroenterology
The division continues a robust inpatient and outpatient practice and is an integral part of the educational experience for the Internal Medicine residency. The division is looking for new opportunities for clinical and educational platforms.

**Patient Care:** The Division of General Internal Medicine is comprised of 18 members, including the two chief medical residents and one PhDs. All full time clinical faculty are certified by the American Board of Internal Medicine. The clinical care provided by members of the division include the provision of inpatient care as the attending for the four inpatient teaching services and an inpatient Internal Medicine consultation service, including medical evaluation of patients admitted to the inpatient Psychiatry service. Win Aung, who oversees the medicine consultation service, are trained in bedside ultrasound guided procedures. The procedural service is available to other services to ensure the provision of safe care.

The group has a busy outpatient practice offering services at three locations: the Ambulatory Care Center (ACC) at UF Health Jacksonville, the UF Internal Medicine Clinic at Emerson Multispecialty Clinic and the General Internal Medicine Clinic at UF Health North. Based on patient satisfaction scores, the physicians in the group are considered excellent clinicians. In addition to the excellent physicians in the group, the outpatient primary care practices are certified as NCQA Level 3 Patient Centered Medical Homes. Our outpatient practices offer two unique clinical initiatives. The PADDD (Program for Adults with Intellectual and Developmental Disability) clinic established in 2013 provides primary care services and care coordination to adults with special needs who are unable to manage their health independently. The PADDD providers, Drs. Edwards and Jacob, provide care to almost 200 adults with intellectual and developmental disabilities. RN care coordination of these patients has been supported by a grant from the Jess Ball DuPont Foundation.

Our four inpatient teaching services are supervised by two teaching hospitalists, Drs. Aung and Reddy and other members of the Division of General Internal Medicine. The four teaching services provide an excellent educational experience for the internal medicine residents as well as residents from anesthesiology, psychiatry preliminary residents in neurology. Medical students from the University of Florida College of Medicine and other non-UF medical schools have an opportunity to work alongside our teaching faculty. There is an excellent group of teaching faculty and residents. As part of the inpatient wards and consultation service, residents and medical students learn the use of bedside ultrasound to assist in diagnosis and in performance of procedures. Dr. Aung has prepared a comprehensive curriculum using simulation training to assess their skills and pre- and post-tests to assess the knowledge. The division continued to work through the challenges of the COVID-19 pandemic. As in the previous years, Surge Teams were required to get the department through the increased clinical demands and strain that the pandemic caused.

The division has two faculty members with training in hospice and palliative care: Dr. Ravindra Maharaj and Dr. Win Aung. Dr. Maharaj also holds a certificate of added qualifications in Geriatrics. Along with a growing outpatient geriatric practice and palliative care practice, Dr. Maharaj offers hospice and palliative care services to our inpatient services. He is providing a much needed service, as well as education, on the role of palliative care and hospice in the care of our patients. During the pandemic, the services of hospice and palliative care have been critical as physicians, patients and families made difficult decisions.

**Education:** As noted above, resident and student education are woven into the division’s practice. The GIM faculty provide supervision of residents on the four general internal medicine inpatient teaching services, the inpatient medicine consultation and procedural service and geriatrics and hospice and palliative care. In addition, the members of the division provide faculty supervision and mentoring of all categorical medicine residents in their outpatient continuity practice and urgent care clinics. Members of the division participate in morning report, morbidity and mortality conferences and present at the noon conference core curriculum series held daily, as well as a Friday afternoon board review.

**Quality:** Dr. Jeff House coordinates Quality Improvement (QI) for the Department and for the training program. Dr. House is the Associate Chair of Medicine for Quality and Education. He is the chair of the Medical Performance Improvement Committee (MPIC) and is a member of the Performance Improvement Committee-the institutional body that oversees quality and safety for the UF Health Jacksonville campus. Dr. Jacob serves on MPIC as the GIM representative. The division has focused on readmissions and patient satisfaction this past year. Due to previous work by QI teams in collaboration with case management, GIM readmission rates have dramatically improved. The division continues to address timeliness of discharges and throughput, as well as identify opportunities to continue to improve our patient satisfaction. In the outpatient setting, Dr. Palacio coordinates a number of quality improvement projects with the residents to look at access, show rates and whether preventive care and screening guidelines are being met. The use of quality dashboards in EPIC has allowed our practice to improve its cancer screening and immunizations and to reduce care gaps in our patient population. The GME leadership has worked with our EMR team to develop a resident dashboard that will be launched in July. This dashboard will be used as an education tool for residents to review their personal performance on various quality metrics and social determinants of health as well as review their performance compared to their peers in continuity clinics.

**Research:** Research in the division varies among the faculty. The development of the bedside ultrasound curriculum and the quality improvement/patient safety block rotation have led to poster presentations and other opportunities for educational scholarship. Many of the faculty mentor residents in their research projects and have assisted them in preparing and submitting case reports to the American Federation of Medical Research. The division continues to be productive as demonstrated by the publication list below.

**Future Directions:** To meet the primary care needs of Jacksonville, we expanded our practice to North Jacksonville and our practice continues to grow there, meeting the needs of this sector of Jacksonville and the division participate in morning report, morbidity and mortality conferences and present at the noon conference core curriculum series held daily, as well as a Friday afternoon board review.

Dr. Jeff House serves as Program Director for the Internal Medicine Residency Program and Drs. Elisa Sottile and Carlos Palacio are the Associate Program Directors for the training program. The GME leadership mentors residents in their scholarly work and each year, the number of posters, abstracts, presentations and manuscripts increases. Dr. House has developed a unique rotational and curricular experience for the PGY2 residents that immerse them in quality and safety. This educational experience is well received by the residents and has resulted in quality improvement projects and scholarly activity. Dr. Sottile also serves as the Clerkship Director for medical students from Gainesville who rotate on the Internal Medicine service (inpatient and outpatient).

Dr. Win Aung and the Chief Residents continue to advance the bedside ultrasound curriculum for residents. The program has traditionally been strong in teaching ultrasound assisted procedures, but has significantly increased the experience in bedside point of care US (POCUS).

Drs. Masri and Sottile serve as peer reviewers for the University of Florida College of Medicine-Jacksonville faculty development program. Drs. Sottile and House also serve as a facilitators of the "Residents and Fellows as Teachers"-a 6-8 hour intradepartmental seminar offered each year at the University of Florida College of Medicine-Jacksonville to first year residents and fellows.

The division serves as an integral part of the education program for 3rd and 4th year medical students, as well as physician assistant students, from the University of Florida. Members of the division serve as preceptors for students in both the inpatient setting as well as in our outpatient practice. Student evaluations of their experience are excellent and are reflected in the number of exemplary teacher awards given to faculty within the division each year.

**Future Directions:** To meet the primary care needs of Jacksonville, we expanded our practice to North Jacksonville and our practice continues to grow there, meeting the needs of this sector of Jacksonville and
Duval and Nassau Counties. Our practice at the Southside Multispecialty Clinic also continues to grow and receives referrals from our specialty colleagues who practice at that location as well. The PAIDD clinic for adults with intellectual and developmental disabilities receives referrals from Northeast Florida because of the unique service provided to our special needs population.

The division, along with our residents will have the opportunity to develop performance improvement initiatives that will lead to improved patient care and safety and result in the preparation of scholarly works. Epic dashboards, particularly for resident performance, are a focus for the upcoming year. When this platform is refined, it will serve as a unique resource for resident feedback on clinical measures, quality improvement projects, and scholarly activities.

Lastly, UF Health Jacksonville continues to move toward a regional campus for medical student education, and with the leadership of Dr. Sottile, the Division of Internal Medicine will be the main driver in this new endeavor.

LISTING OF FACULTY MEMBERS

Win Aung, M.D., Assistant Professor  
Medical School: Institute of Medicine, Myanmar  
Internship/residency: Lutheran Medical Center

Lori A. Bilello, Ph.D., M.B.A., M.H.S., Assistant Professor

Highlights

Despite the ongoing challenges of the lingering effects of the pandemic, the Division of Hematology and Medical Oncology produced notable achievements during this past year. The division provides comprehensive outpatient and inpatient clinical consultative care in hematology and medical oncology while expanding a fully ACGME-accredited fellowship training program. Under the leadership of Division Chief and Program Director W JR Quan, the division expanded its hematologic malignancy service, successfully opened and accrued to its initial externally-supported clinical drug trial, launched its non-malignant blood disorder program with a dedicated Physician’s Assistant supported by the division’s largest external grant to date, added a second dedicated, specialized Registered Nurse coordinator (this one for solid tumors), and increased the number of patients cared for at our facility. The fellowship program matched two outstanding in-coming fellows and celebrated the graduation of another dual board-eligible fellow. Drs. Ghania and Quan each received the University Of Florida College Of Medicine’s Exemplary Teachers Award for outstanding teaching.

Patient care: Our division continues to increase access to our inpatient and subspecialty expertise in evaluation and treatment of hematologic malignancies, non-malignant blood disorders, and solid tumors. We provide both outpatient and inpatient consultative services for hematology and oncology at the downtown campus, which is also the location of the only sickle cell clinic in Jacksonville, Florida. Patient care is readily convenient at UF Health Jacksonville campus. To provide the best quality of patient care, collaboration with multiple specialties through mechanisms including multidisciplinary tumor conferences are ongoing. Our division has added a palliative care outpatient clinic twice per week that emphasizes alleviation of cancer-related pain and other symptoms. Our faculty members collaborate closely with the Proton Therapy Institute and the Departments of Surgery and Gynecologic Oncology. Faculty actively educate patients in-person, via telemedicine, and through patient education sheet facts distributed by disease diagnosis.

Education: The prior long-standing medical oncology fellowship has been supplanted by a fully ACGME-accredited three-year combined hematology/oncology fellowship leading to dual board eligibility. The didactic curriculum has expanded to include Hematology core lectures, hematology-based clinical rotations, and fellow-oriented reviews for the in-service training exam. The initial two graduates of the program successfully passed both Hematology and Oncology board examinations.

Our faculty offers a consult experience in hematology and oncology to residents at all training levels. Faculty development sessions including those on small group teaching, teaching under time constraints, and diversity/inclusion contribute to the educational growth of our division.

The division continues to support the Internal Medicine Residency Program through didactic involvement in the Internal Medicine resident’s noon conference, and the Department of Medicine Grand Rounds. The hematology oncology fellowship has rotations at Mayo Clinic Jacksonville (Stem Cell Transplant, benign hematology). Fellows are active participants in a weekly lecture series which encourages and develops teaching skill.

Research: The Division of Hematology and Medical Oncology opened its two initial externally-supported clinical drug trials using new agents in Acute Myeloid Leukemia and Essential Thrombocythiosis. Additional drug trials in solid tumors such as lung cancer as well as the premiere of our investigator-initiated trials is anticipated in the upcoming academic year. Our division continues to provide academic support to residents though mentorship in research projects and publications.

Highlights

The Division of Infectious Diseases continued its clinical and academic missions during this past year. The division is comprised of 3 university based infectious diseases consultants at the primary teaching hospital, all of whom are dually boarded in Internal Medicine and Infectious Diseases. We have an additional 15 ancillary faculty composed of board certified infectious diseases physicians, doctoral level microbologists, a doctoral level pharmacists, Antimicrobial Stewardship Director and 2 masters level Infection Prevention epidemiologists, who are actively involved in the fellowship training program.

The division provided inpatient clinical Infectious Diseases consultation at UF Health Hospitals/Jacksonville and North; Hospital Infection Prevention and Control and Antimicrobial Stewardship direction at UF Health Hospitals and outpatient infectious diseases consultation at the downtown Ambulatory Care Clinic, Emerson Campus Clinic and North Campus clinic. The division maintained an ACGME accredited Infectious Diseases fellowship training program and actively participated in the training of internal medicine residents and medical students in inpatient and outpatient infectious diseases.

Members of the division also assumed administrative and teaching roles in the ID division and IM activities. Dr. Sands is the university ID Division Chief, ID Fellowship Associate Program Director and the Medical Director of Hospital Infection Prevention and Control for UF Health Hospital. Dr. Isache is the Chair of the Antimicrobial Stewardship Programs for UF Health Hospital and the ID Fellowship Program Director.

Patient care: The division provided full time inpatient infectious diseases consultation throughout the UF Health Jacksonville Hospital system. During the 2021-2022 academic year, the division performed over 1300 inpatient infectious diseases consultations with over 1200 subsequent follow-up visits at UF Health Hospital.

Outpatient services: The division offered outpatient ID consultation by referral at the Emerson and the Ambulatory Care Clinic (ACC) subspecialty clinics. During the 2021-2022 academic year, there were over 950 outpatient ID visits for HIV/AIDS and general Infectious Diseases diagnoses including chronic osteomyelitis and MRSA infection.

Education: Grand Rounds: The division actively participates in presenting at Medical Grand Rounds and as regular attendees. This academic year faculty gave presentations at 3 UF Grand Rounds.

Fellowship Training: The division maintained an ACGME accredited fellowship in Infectious Diseases with one fellow for each of the two clinical fellowship years. The fellowship program has been reaccredited on a five-year cycle. The fellowship training is unique in offering two months of clinical microbiology, dedicated research time, two months of training in solid organ transplantation ID at the Mayo Clinic, one month training in Pediatric Infectious Diseases at Wolfson Children’s Hospital and one month as a junior ID faculty consultant in the UF Health MICU. In addition to 14 months experience as the consultant and teaching fellow on the general ID inpatient consult service at UF Health.

Our Infectious Diseases fellows continue to distinguish themselves through maintaining a 100% ID boards pass rate and achieving successful employment as full time Infectious Diseases consultants in a variety of metropolitan areas, including San Francisco, Atlanta, Baton Rouge, Tampa, Orlando and here in Jacksonville.
Infectious Disease  Division Chief: Michael Sands, M.D.

Resident Training: Faculty provided a 12 lecture series ID core curriculum conference for the residents; ID consultation teaching and clinical rounds; outpatient HIV/AIDS continuity clinics; and resident ID board review sessions.

Medical Student Education: Medical students from UF Gainesville, other US sites and internationally, rotate on the infectious diseases consultative service and the outpatient ID clinics at both the ACC and Emerson campuses.

ID Division Conference Schedule: The division maintained a full conferencing schedule with topics including: core infectious diseases topics, regularly scheduled case conferences; ID board reviews; monthly journal club; HIV topical reviews; monthly TB cases and topical reviews; monthly research conferences; travel and tropical medicine conferences; transplantation ID conferences; and monthly Med/Peds ID joint conferences.

Cooperative extramural resident and fellows' training: As part of their curricula, Mayo Clinic ID fellows, UF Intensivist fellows, UF Pediatric ID fellows and UF Podiatry-Orthopedic residents rotated on the UF ID inpatient consultative service and in the HIV outpatient clinics.

Research: Dr. Sands was the principal investigator on two NIH sponsored research grants through the INSITE network; the START and Smart studies, now completed, to define the appropriate time to initiate antiviral therapy for HIV-infected patients. Post hoc analyses of the data has continued to yield valuable results and publications.

Publications and presentations this past academic year included 7 journal articles published in peer reviewed journals, 3 published ID monographs, 4 presentations and 1 abstract presented at regional and national meetings.

**Highlights**

In the 2021 - 2022 academic year, the Division of Nephrology and Hypertension continued to make headway in meeting the goals of the academic mission.

In patient care, the offsite dialysis ventures with DCI at the Gateway and Midtown Hemodialysis Units have continued to support the hemodialysis mission for UF. ARNP’s Melissa Goalen and Shatura Rowe played essential roles in the care of our large outpatient dialysis population.

In education, the Nephrology fellowship progressed successfully with continuation of Simulation Trainings and renal transplant rotations at Mayo Jacksonville, plus the Emerson and Downtown clinics with renal transplant patients. The Emerson site Renal Transplant Clinic has been staffed by Dr. Vishal Jaikaransingh with Renal Fellows rotating through the clinic. The Downtown Post-Renal Transplant Clinic has been staffed by Dr. Ronald Mars along with Renal Fellows rotating through the clinic.

Dr. Vishal Jaikaransingh continues as the Associate Program Director for the fellowship, and he continues as organizer of the fellows’ Renal Physiology and General Nephrology Lecture Series.

The joint Renal Pathology Conference with Mayo Clinic Jacksonville and Mayo Clinic Rochester continued as a successful and important piece of the educational program, as did the Mayo Clinic Jacksonville core lecture series on renal transplantation. The annual Update in Nephrology & Hypertension CME Symposium continued in 2022 as a virtual conference due to the COVID-19 pandemic. Dr. Ronald Mars received an Exemplary Teacher Award this academic year. Dr. Vishal Jaikaransingh received an Exemplary Teacher Award, and a University of Florida Five-Star Provider Patient Experience Award, 2021.

The Division presented abstracts virtually at the 2021 ASN Meeting. The research laboratory of Dr. Charles Heilig continued basic research studies into the pathogenesis of diabetic and nondiabetic glomerulosclerosis in diabetic and transgenic mouse models, with a focus on the roles of Mechano-Growth Factor (MGF) and glucose transporters. He licensed a laboratory invention to Applied Biological Materials Inc., Vancouver, British Columbia, via the UF Technology Office.

Fellows and/or faculty participated in meetings of the American Society of Nephrology, the National Kidney Foundation, and a national Home Dialysis Educational Seminar.

**Patient care**: The Division of Nephrology provided physician services and the medical director for two outpatient chronic dialysis units and also provided services to the inpatient UF Health Jacksonville acute hemodialysis unit. Dialysis Services provided include hemodialysis (HD), peritoneal dialysis (PD), and inpatient CRRT. Faculty clinics were staffed at the Towers Clinic on the downtown campus by the hemodialysis unit. Dialysis Services provided include hemodialysis (HD), peritoneal dialysis (PD), and inpatient CRRT. Faculty clinics were staffed at the Towers Clinic on the downtown campus by the hemodialysis unit. ARNP’s Melissa Goalen and Shatura Rowe played essential roles in the care of our large outpatient dialysis population.

In education, the Nephrology fellowship progressed successfully with continuation of Simulation Trainings and renal transplant rotations at Mayo Jacksonville, plus the Emerson and Downtown clinics with renal transplant patients. The Emerson site Renal Transplant Clinic has been staffed by Dr. Vishal Jaikaransingh with Renal Fellows rotating through the clinic. The Downtown Post-Renal Transplant Clinic has been staffed by Dr. Ronald Mars along with Renal Fellows rotating through the clinic.

Dr. Vishal Jaikaransingh continues as the Associate Program Director for the fellowship, and he continues as organizer of the fellows’ Renal Physiology and General Nephrology Lecture Series.

The joint Renal Pathology Conference with Mayo Clinic Jacksonville and Mayo Clinic Rochester continued as a successful and important piece of the educational program, as did the Mayo Clinic Jacksonville core lecture series on renal transplantation. The annual Update in Nephrology & Hypertension CME Symposium continued in 2022 as a virtual conference due to the COVID-19 pandemic. Dr. Ronald Mars received an Exemplary Teacher Award this academic year. Dr. Vishal Jaikaransingh received an Exemplary Teacher Award, and a University of Florida Five-Star Provider Patient Experience Award, 2021.

The Division presented abstracts virtually at the 2021 ASN Meeting. The research laboratory of Dr. Charles Heilig continued basic research studies into the pathogenesis of diabetic and nondiabetic glomerulosclerosis in diabetic and transgenic mouse models, with a focus on the roles of Mechano-Growth Factor (MGF) and glucose transporters. He licensed a laboratory invention to Applied Biological Materials Inc., Vancouver, British Columbia, via the UF Technology Office.

Fellows and/or faculty participated in meetings of the American Society of Nephrology, the National Kidney Foundation, and a national Home Dialysis Educational Seminar.

**Education**: The fellows’ Renal Physiology Lecture Series, initiated in 2010, continued under Dr. Jaikaransingh’s guidance as an important component of the nephrology educational experience. The joint Renal Pathology Teleconference including UF Health Jacksonville, Mayo Jacksonville and Mayo Rochester, has continued to be an important educational component for the Nephrology Fellowship program. The annual Update in Nephrology and Hypertension continued to be an important educational venue for fellows and faculty alike in 2022. This symposium typically includes UF faculty, and at times visiting speakers.

The Nephrology faculty continue to participate in educational programs for the Medicine residents, including the Medicine Residents’ Noon Conferences, Nephrology Clinics & the Nephrology Hospital Consult Rotations. The Mayo Clinic Jacksonville Renal Transplant Rotation for UF Health Jacksonville Nephrology fellows continued successfully and complements the Nephrology training program at UF Health. The ACGME-required milestones have been incorporated into the fellowship training program and rotation evaluations.

**Research**: The topics of research studies in the Division spanned from basic science work on glucose transporter & growth factor roles in diabetic and nondiabetic glomerular disease, to modified dialysis prescription investigation. Dr. Heilig’s laboratory focuses on glucose transporter- and MGF- regulation of glomerulosclerosis in both diabetic and nondiabetic kidney disease. Dr. Iritza Hasan investigated mechanisms of glomerulosclerosis in patients with nondiabetic or diabetic renal disease. Dr. Ronald Mars investigated the efficacy of modified dialysis prescriptions for cost saving in hemodialysis. Dr. Alaa Awad joined the faculty in December 2021, and continues his studies on diabetic kidney disease.

The Nephrology fellows participated in various different research studies & scholarly activities as part of their research training. Fellows also participated in scholarly activities for the 2021 virtual American Society of Nephrology Meeting. The Nephrology Division produced 1 manuscript, 3 abstracts, 3 presentations, and had one research grant.

**Special Initiatives**: Nephrology & Hypertension Annual Update, Jacksonville, FL: This year’s meeting was held as a virtual conference due to COVID-19. This yearly meeting typically provides education and CME credits. Doctors, nurses and others involved in the care of patients with renal disease attend the meeting. The Activity Director was Dr. Ronald Mars.

Nephrology Fellows’ Quality Improvement Project in Dialysis: The faculty worked with the fellows on this important activity in hemodialysis which helped to fulfill the ACGME – required competency requirements.

Nephrology Fellows’ Patient Safety Project: This Fistula-First Project includes, but is not limited to, fellow timely referral for and tracking of AV-fistula placement, outcomes from the time of referral to dialysis initiation and beyond. Goals include optimizing AVF prevalence and function for initiation of dialysis, reduction of vascular access complications once dialysis has begun, and fellow analysis of patient outcomes, by type of access initially used.

Simulation Laboratory Experiences: The Nephrology fellows received Institutional Patient Safety Training in the Simulation Laboratory. They also participated in the yearly Nephrology Simulation Laboratory experiences for temporary hemodialysis catheter placement and renal biopsy.

Fistula First Initiative: Faculty and fellows continue to participate in this quality improvement and patient safety initiative, aimed at improving patient outcomes on hemodialysis.
LISTING OF FACULTY MEMBERS

Alaa Awad, M.D., Professor
Medical School: Cairo University School of Medicine, Egypt
Internship/residency: Penn State Hershey Medical Center
Subspecialty training: UT – Health San Antonio, TX

Subspecialty training: University of Chicago–Transplant Nephrology

Ronald Mars, M.D. Associate Professor
Medical School: St Louis University
Internship/residency: Emory University
Subspecialty training: Emory University

PUBLICATIONS

DIVISION OF PULMONARY, CRITICAL CARE AND SLEEP MEDICINE
ACADEMIC YEAR 2021 (7/21 - 6/22)

Highlights

The Division of Pulmonary, Critical Care and Sleep Medicine has shown resilience thru a Global Pandemic with productive faculty members. There have been some staff changes as Dr Mehdi Mirsaeidi joined the Division in November 2021 as Division Chief. The fellowship program was approved for a complement increase to 1 critical care fellow per year starting 2022 and the fellowship training program continues to be popular with almost 500 applications for the three available positions per year. Clinically, we continue the expansion of Pulmonary Disease clinics and consultation services at UF North. Academically, the division continues to be productive in the areas of clinical and original research and publications. The faculty members are involved in several committees and assemblies of American Thoracic Society, American College of Chest Physicians, and Pulmonary Hypertension Association. The fellows, under the mentorship of faculty, are engaged in a number of clinical studies, to include COVID-19 related studies. The division had a number of abstracts presented in national and international conferences and was represented in various national and international meetings in the form of providing educational lectures.

Patient care: The division faculty staffs a number of specialty and general pulmonary clinics. The asthma clinic, under the supervision of Dr. Cury, continues to be a part of the American Lung Association Asthma Clinical Research Network and is involved in successful industry funded clinical research in this arena.

The pulmonary hypertension clinic, under the leadership of Dr. Seeram and Dr. Najjar, continues to be a locally known referral center with patients being referred from regions all over our coast. As member of the Pulmonary Hypertension Association, it is on track to become a Regional Referral Center with a successful first site visit in December 2019. We continue to host a successful Pulmonary Hypertension support group for patients and caregivers and have transitioned well to a virtual format. Nationally renowned speakers have been guest speakers at these support group meetings. The clinic currently manages over 150 pulmonary hypertension patients and our faculty perform the required right heart catheterizations in a dedicated suite to complete the comprehensive assessments of this patient population.

Alicia Peters, RN has been newly appointed as the Pulmonary Hypertension and Pulmonary Disease Clinical Coordinator.

The Interstitial Lung Disease and Sarcoïdosis clinic, under the leadership of Dr. Mirsaeidi and Dr. Najjar, continues to expand and is involved in numerous clinical trials around ILD. The program has started MDD meeting with collaboration with Division of Rheumatology, Department of Radiology and Pathology.

The fellows’ continuity clinic is staffed and supervised by faculty three days weekly. The number of pulmonary function, 6MWT, NIOX testing performed over both campuses has increased with the addition of a dedicated RT at Faculty Pulmonary clinic and the addition of an oxygen assessment and 6 minute walk clinic.

The thoracic oncology clinic continues its multidisciplinary approach to patients with thoracic malignancy. The division expands the bronchoscopy program at the North campus with Drs. Ashby and Najjar. The lung cancer screening program has been restructured and will be expanded to UF North Hospital.

The MICU continues care of patients with COVID-19 during the pandemic surge. Our faculty provided continued coverage in the Medical ICU since COVID19 started. The dedication, courage, professionalism is exemplary amongst our faculty, MICU nursing, and ancillary staff.

The inpatient pulmonary consult service continues to be busy and, with the continued evolution of the bronchoscopy, thoracoscopic and right heart catheterization suite, there has been an increase in the number, efficiency and timeliness of procedures offered by the division. The COVID+ patients have been consulted to the pulmonary service for recommendations on management and continuity of care. Our faculty have contributed to the monthly hospital COVID guidelines that are available on the UF Health Bridge and provide guidance on the constantly evolving body of evidence behind the management practices for hospitalized COVID 19 patients.

Pulmonary consult service at UF North has recently initiated and will continue its growth. The Division is involved in improving quality of care of inpatients with pulmonary diseases including reducing COPD readmission rate at UF-North.

The Division has central role in Sleep Medicine. UF Health operates a combined 8 bed Sleep Center accredited by the American Academy of Sleep Medicine (AASM). The UF Health Sleep Center operates seven nights per week and features state-of-the-art monitoring equipment, including out of center testing between the UF Health Jacksonville Downtown and North campuses. Dr. Lewis as Sleep Program director is involved in quality improvement initiatives, and clinical or translational research in sleep.

Education: The faculty has been invited to present lectures at international conferences such as ATS, CHEST, and SETA in the past year, which is a reflection of national recognition of our division.

The division continues to play an active role in educational core lecture series including Grand Rounds and Updates in Internal Medicine 2021-2022. The division faculty also has an active role in the educational lectures for a variety of residency programs including Navy family medicine, emergency medicine, obstetrics, internal medicine and trauma critical care. Dr. Seeram was honored by University of Florida Internal Medicine residency Teacher of Year Award for years 2016, 2017, 2018 and 2020.

Dr. Vandana Seeram continued as the Pulmonary Medicine and Critical Care Medicine Fellowship Director coordinating the educational activities for the fellowship with continued 100% first time board pass rates. Dr. Najjar has been appointed as associate program director as expansion of our fellowship program. The fellowship program has been granted a complement increase to three fellows per year and hopes to continue with the expansion efforts. As a result of the increased number of fellows, there will be the implementation of a night float fellow on most nights which will help with continuity of care and resident guidance in the MICU.

The division was involved in various regional/national/international meetings with faculty representing the University of Florida College of Medicine-Jacksonville by providing educational lectures in various topics of interest and Dr Lewis presented at the Chest 2022 which was held virtually. Dr. Mirsaeidi Presented at ATS 2022 that was held in San Francisco.

The faculty continues to mentor and supervise family medicine residents from the Navy residency program during their rotation in medical intensive care unit and have always received very positive feedback from the leadership of Naval Air Station Jacksonville. We have been active in training nurse practitioners and physician assistants not only from the University of Florida sponsored training programs but also from local sponsored programs.

Research: The division has been very successful in obtaining and continuing its clinical research trials along with funded research. The funded research includes dean’s grants, UF clinical quality grant and investigator initiated trials. The number of internal unfunded clinical research protocols has also increased substantially resulting in quality abstracts being presented at national and international meetings. A dedicated basic science research lab was developed by Dr. Mirsaeidi team and has enabled the division to participate in more collaborative translational research protocols including development of lung cancer research team, collaboration with UF Cancer Center, and development to UF Phage Center.
The faculty has had a number of publications in peer review journals and has manuscripts in preparation. Close collaboration with other departments with common research interests is the key to future protocols and publications.

LISTING OF FACULTY MEMBERS

Tracy Ashby, D.O., Assistant Professor
Medical School Lincoln Memorial University

The Division of Rheumatology and Clinical Immunology had a successful and productive academic year on multiple levels. We have seen some of the fruits of our dedication to the University of Florida College of Medicine–Jacksonville (UFCOM-J) mission. The Division has significant accomplishments in patient care, research and education.

The Division continues to work with other training programs and the GME office at UFCOM-J in order to provide mentoring and teaching for many students and residents who are interested in our specialty. The current Rheumatology fellowship started in July 2018. Our latest graduate, Dr Sukhraj Singh completed his fellowship in June 2022 and started private practice in Orlando, Florida. The Division has continued to be active in virtual ultrasound educational activities at the national and international level.

The backbone to our success is the loyal and hardworking staff at our clinics, hospital and administrative offices. During the COVID pandemic, faculty, fellows, clinic and administrative staff worked hard to rapidly adapt to virtual visit practices to allow continuity of care of patients. We are pleased to announce that Dr Karishma Ramsubeik was granted promotion to Clinical Associate Professor of Medicine from July 2022.

Despite the challenges posed by COVID 19, the Division increased clinical volume for the academic year. Patient encounters include, but are not limited to, many types of arthritis, lupus, scleroderma, myositis, autoimmune and systemic diseases, osteoporosis, connective tissue diseases related to inflammation and metabolic dysfunction, soft tissue conditions and pain such as fibromyalgia. We continue to be on the forefront of providing very up to date rheumatology services and 24/7 ultrasound services related to rheumatologic care both for inpatient and outpatient settings. In the outpatient setting, we provide full rheumatology coverage from Monday through Friday, where we provide diagnostic musculoskeletal ultrasound and musculoskeletal procedures under ultrasound guidance.

In the educational program of the University of Florida medical students and residents, Dr. Ramrattan, Dr. Thway, Dr. Ramesubek and Dr. Kaaley participated in precepting clinics in rheumatology and delivered core curriculum lectures for the Internal Medicine Residency Program. Faculty members participated in internal medicine Grand Rounds and shared the knowledge as invited rheumatology speakers on a regular basis.

Patient care: Despite the challenges posed by COVID 19, the Division increased clinical volume for the academic year. Patient encounters include, but are not limited to, many types of arthritis, lupus, scleroderma, myositis, autoimmune and systemic diseases, osteoporosis, connective tissue diseases related to inflammation and metabolic dysfunction, soft tissue conditions and pain such as fibromyalgia. We continue to be on the forefront of providing very up to date rheumatology services and 24/7 consultations at UF Health Jacksonville Main Campus and UF North Campus, the Ambulatory Care Clinic and our dedicated outpatient clinic on Emerson Street. The Division also provides musculoskeletal ultrasound services related to rheumatologic care both for inpatient and outpatient settings.

Excellence is our only goal when it comes to patient care. Our faculty members achieved or exceeded the average in our specialty and in comparison to others at our institution. We touch our patients’ lives during some of the most vulnerable moments they will ever encounter alone or with their loved ones. As physicians of the UFCOM-J, we always strive for excellence in our practice.

Education: Education is one of the main missions at the UFCOM-J. Our faculty members have been very dedicated and creative in delivering the best of what they can offer to our students and residents. Our achievements in education were highlighted in multiple venues and the rheumatology fellowship program successfully attained fellowship accreditation starting in July 2018. The fellowship provides a strong clinical focus as well as many opportunities in clinical research, quality improvement as well as musculoskeletal ultrasound.

In the educational program of the University of Florida medical students and residents, Dr. Ramrattan, Dr. Thway, Dr. Ramesubek and Dr. Kaaley participated in precepting clinics in rheumatology and delivered core curriculum lectures for the Internal Medicine Residency Program. Faculty members participated in internal medicine Grand Rounds and shared the knowledge as invited rheumatology speakers on a regular basis.
The division has remained active in virtual education at the national and international level especially in musculoskeletal ultrasound. These efforts have included presentations at national and international meetings as well as creation of training videos to be used on an international level.

E-Learning is an entrepreneur unique project that was pioneered by Dr. Kaeley. The aim of this project is to develop electronic learning content to cover basic Rheumatology Core Curriculum, as well as musculoskeletal ultrasound learning material. Dr. Kaeley has successfully deployed Canvas to enable enhancement and deep learning with the fellowship program. The division has also undertaken novel organizational tools such as Trello to improve efficiency.

**Research:** The Division has been growing its research enterprise and has two research coordinators. Although the Division is active in numerous pharmaceutical trials, its emphasis is to develop investigator-initiated trials as well as to seek grants. The division has a strong quality improvement program. The Division has collaborated with multiple national renowned researchers. The Division continues to collaborate with the University of California, Los Angeles Division of Rheumatology in a bi-center prospective trial of Tocilizumab in Rheumatoid Arthritis, utilizing Power Doppler as a secondary outcome measure. In addition, the Division has collaborations with the Women's Hospital, Toronto as well as University of Ottawa as part of an international effort to develop a musculoskeletal ultrasound enthesis diagnostic tool. The Division has also been evaluating Medicare Expenditures for Musculoskeletal Ultrasound as well as drug utilization. The Division also had multiple poster presentations at the American College of Rheumatology virtual convergence meeting as well as creation of training videos to be used on an international level.

**PUBLICATIONS**

**Manuscripts:**

**Book Chapters:**

**Books:**

Web Based Electronic Learning Content:

October 2020 - Present: Editor-in-Chief Dr. Earl Silverman speaks with the team behind the paper Imaging Techniques: Options for the Diagnosis and Monitoring of Treatment of Enthesitis in Psoriatic Arthritis. Catherine Bakewell, Sibel Zehra Aydin, Veena K. Ranganath (absent), Uli Eder and Gurjit S. Kaeley. https://www.youtube.com/watch?v=YuGqBlp5h8k&feature=youtu.be

August 2020 - Present: Group for Research and Assessment of Psoriasis and Psoriatic Arthritis (GRAPPA) musculoskeletal ultrasound videos:

a. Kaeley, GS. Ultrasound of Dorsal Wrist Joints
b. Kaeley, GS. Screening for Dorsal Tendovaginitis
c. Kaeley, GS. Evaluating the Volar Finger for Tendovaginitis
d. Kaeley, GS. Evaluating Dorsal Knee Recesses
e. Kaeley, GS. Dorsal Toe Synovitis Evaluation

March 2020 - Present: Group for Research and Assessment of Psoriasis and Psoriatic Arthritis (GRAPPA) Enthesitis Ultrasound Training Videos. Eder L, Aydin SZ, Kaeley, GS. Illustrations Roth J. Site contains seven training videos.

UF Canvas Electronic Learning Management System for Rheumatology Fellowship:

Abstracts Presented:

Activities and Presentations:

Kaeley, G.S. Faculty for hands on instruction of diagnostic and interventional procedures. Clinical Applications: Ultrasound for Rheumatoid Arthritis, Psoriatic Arthritis and other Musculoskeletal Diseases. April 2022. Columbus, Ohio.
